ABOUT ME

Motivated and detail-oriented IT professional pursuing a Master of Computer Application (MCA) with hands-on experience in full stack web and mobile application development. Proficient in Python, JavaScript, React Native, and SQL, with a strong foundation in software development, programming, and system management. Adept at delivering user-centric solutions and eager to contribute technical expertise to drive organizational growth.

WORK EXPERIENCE

INEXPENSIVE CODERS MAR 2025-NOW

Full Stack Developer

Worked on the 'Book An Appointment' project, gaining practical experience in full stack development and project management.

- Built responsive mobile and web versions.
- Improved debugging and problem-solving skills.

PROJECTS

DIGITAL PARKING SYSTEM

January 2025 - June 2025

Developed a mobile-based application using React Native, HTML, CSS, JavaScript, Core PHP, and SQL.

- Integrated APIs to enable real-time parking slot booking and management.

HOLIDAYS TRIPS AND PACKAGE

January 2022 - June 2022

Designed and implemented a web-based application for browsing and booking holiday packages using HTML, CSS, and Python.

- Enhanced user experience by simplifying the holiday planning and booking process.
